4. FIRST AID MEASURES

Inhalation:	Remove victim to fresh air. Seek medical advice.
Skin contact:	Flush thoroughly with plenty of water and soap.
Eye contact:	In case of contact, immediately flush eyes with copious quantities of water for at least 15 minutes. In all cases of eye contamination it is a sensible precaution to seek medical advice.
Ingestion:	Rinse out mouth and give plenty of water to drink. Induce vomiting. Seek medical advice.
First Aid Facilities:	Ensure washing facilities are available.

5. FIRE FIGHTING MEASURES

Extinguishing media:	Water jets or water spray (large quantities), fog or foam.
Hazards from combustion products:	The product is not combustible, however it promotes fire. Decomposes on heating emitting toxic fumes including those of potassium nitrate, potassium peroxide.
Precautions for fire fighters:	Oxidiser. Keep away from reducing agents. Will explode if heated to 1000 °C in presence of reducing agents, organic materials or when mixed with cyanides. Do not inhale explosion or combustion gases. Use suitable respiratory protective device. Goggles giving complete protection to eyes. Plastic or synthetic rubber gloves. Fires should be fought from a protected location. Keep containers and adjacent areas cool with water spray. If safe to do so, remove containers from path of fire.

6. ACCIDENTAL RELEASE MEASURES

Wear protective equipment to prevent skin and eye contamination and inhalation of dust. Sweep up, but avoid generating dust. Ensure adequate ventilation. Keep away from sources of ignition. Collect and seal in properly labelled containers for disposal or reuse. Wash area down with excess water. Do not contaminate streams, rivers or waterways.
