

SAFETY SHEET FERRILENE TRIUM

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1.	Product identifier Mixture identification:				
	Trade name:	FERRILENE TRIUM			
	Trade code:	12459			
1.2.	Relevant identified uses of the su	ubstance or mixture and use	es advised against		
Rec	ommended use:		1990 - A.		
	Fertilizer				
1.3.	Details of the supplier of the safe	ety data sheet			
	Distributed and guaranteed by:				
Campbells Fertilisers Australasia					
	18 Raymond Road, Laverton No	orth, Victoria, 3026			
	Phone: (03) 9931 2211				
	Fax: (03) 9931 2201				
	www.campbellsfert.com.au				
	Competent person responsible f regulatory@valagro.com	or the safety data sheet:			
1.4.	Emergency telephone number				

Poison Information Centre - Telephone: 131126 (Australia wide – 24HRS)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to the Hazardous Substances (Classification) Notice 2017 of the HSNO Act, 1996:

The product is classified as non hazardous according to the Hazardous Substances (Classification) Notice 2017 of the HSNO Act, 1996

<u>Classification according to OSHA Hazard Communication Standard (29 CFR 1910.1200):</u> The product is not classified as dangerous

EC regulation criteria 1272/2008 (CLP): The product is not classified as dangerous according to Regulation EC 1272/2008 (CLP).

Adverse physicochemical, human health and environmental effects: No other hazards

2.2. Label elements None
2.3. Other hazards vPvB Substances: None - PBT Substances: None
Other Hazards: No other hazards

	N 3: Composition/information on ingredients . Substances
	N.A.
3.2	. Mixtures
	Hazardous components related classification:
	None
ΕCTIO	N 4: First aid measures
4.1	. Description of first aid measures
In o	case of skin contact:
	Immediately take off all contaminated clothing.
	Areas of the body that have - or are only even suspected of having - come into contact with the
	product must be rinsed immediately with plenty of running water and possibly with soap.
	Wash thoroughly (shower or bath).
Ind	case of eyes contact:
	After contact with the eyes, rinse with water with the eyelids open for a sufficient length of time
-	Get medical attention if irritation persists.
In o	case of Ingestion:
	Never give anything by mouth to an unconscious person
	Rinse mouth with water and if the person is conscious give plenty of water to drink .
	Do not under any circumstances induce vomiting. Get medical attention.
In o	case of Inhalation:
	Remove casualty to fresh air and keep warm and at rest.
4.2	. Most important symptoms and effects, both acute and delayed:
	Inhalation:
	Possible irritation to the respiratory tract
	Skin:
	Possible irritation according to the contact time with the product
	Eve:
	Possible irritation according to the contact time with the product
	Ingestion:
	Possible irritation of mouth and digestive tract.
4.3	. Indication of any immediate medical attention and special treatment needed
	In case of accident or unwellness, seek medical advice immediately (show directions for use o
	safety data sheet if possible).
	Treatment:
	N.A.
	N 5: Firefighting measures
5.1	. Extinguishing media
	Suitable extinguishing media:
	Water.
	Carbon dioxide (CO2).
	Extinguishing media which must not be used for safety reasons:

Extinguishing media which must not be used for safety reasons:

None in particular.

5.2. Special hazards arising from the substance or mixture Do not inhale explosion and combustion gases. Burning produces heavy smoke containing nitrogen oxides, metal oxides.

5.3. Advice for firefighters

> Wear suitable personal protective equipment and self-contained breathing apparatus. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

Move undamaged containers from immediate hazard area if it can be done safely. Protective clothing for firefighters (full protective suit, helmet, gloves, boots) must conform to the standard EN469.

SECTION 6: Accidental release measures

- 6.1. Personal precautions, protective equipment and emergency procedures
 - For non-emergency personnel:
 - No action shall be taken involving any personal risk or without suitable training.

Wear protective clothes giving a total skin protection, gloves, safety glasses and mask with filter P2.

Keep away from the affected area people not involved in the emergency intervention. Ensure adequate ventilation, move people in a safe place.

Alert the internal emergency team.

- For emergency responders:

Wear protective clothes giving a total skin protection, rubber gloves, safety glasses and mask with filter P2.

Ensure adequate ventilation, move people in a safe place.

See protective measures under point 7 and 8.

Avoid dust generation.

Dusts at sufficient concentrations can form explosive mixtures with air.

Avoid any accumulation of electrostatic charge.

Product layer on hot surface might cause auto-ignition.

6.2. Environmental precautions

Do not allow to enter into soil/subsoil. Do not allow to enter into surface water or drains. Retain contaminated washing water and dispose it in landfill approved.

If possible, collect in clean plastic containers labeled and reuse as fertilizer.

In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.

Suitable material for taking up: absorbing material, sol, sand.

6.3. Methods and material for containment and cleaning up

Collect the product for example using shovel and broom.

Avoid raising dust.

Wash with plenty of water, contain the spill with absorbent material, earth, sand.

6.4. Reference to other sections

See also section 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Avoid contact with skin and eyes, inhalation of dust and mists.

Don't use empty container before they have been cleaned.

Before making transfer operations, assure that there aren't any incompatible material residuals in the containers.

Contaminated clothing should be changed before entering eating areas.

Do not eat or drink while working.

Ensure adequate ventilation.

Avoid dust generation.

Dusts at sufficient concentrations can form explosive mixtures with air.

Avoid any accumulation of electrostatic charge which may create a hazardous condition and cause an ignition.

Avoid contact of product with a hot surface, it might cause auto-ignition.

See also section 8 for recommended protective equipment.

7.2. Conditions for safe storage, including any incompatibilities

Keep in original containers in a cool dry well-ventilated place.

Keep away from food, drink and feed.

Incompatible materials:

Oxidants, reducing agents, acids and bases

Instructions as regards storage premises:

Adequately ventilated premises.

7.3. Specific end use(s) Fertilizer.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

WorkSafe New Zealand_

Recommended value inhalable dust: WES-TWA of 10mg/m3 Recommended value respirable dust: WES-TWA of 3 mg/m³

8.2. Exposure controls

The personal protective equipment must be compliant to the regulation UNI - EN in force Eye protection:

Use close fitting safety goggles according to the standard EN 166, don't use cotact lenses. Protection for skin:

Use clothing that provides comprehensive protection to the skin

Protection for hands:

Wear nitrile rubber gloves according to EN 374.

Respiratory protection:

In case of dust generation, use anti-powder mask with P2 filters according to the EN 149:2001. The powder exposition limit must be respected

Thermal Hazards:

None identified

Environmental exposure controls:

Prevent the contamination of soil, surface water or groundwater

SECTION 9: Physical and chemical properties

9.1. Information on basic physical a	nd chemical properties
Appearance and colour:	black microgranules
Odour:	typical
pH 1% at 25°C:	7,3
Initial boiling point and boiling	y range:not applicable, solid
Flash point:	not applicable, solid
Evaporation rate:	not applicable, solid
Vapour density:	not applicable, solid
Vapour pressure:	not applicable, solid
Apparent Density:	0,8 Kg/dm3
Solubility in water:	80 g/l at 20 °C
Viscosity:	not applicable, solid
Explosive properties:	not applicable, the substance does not have exlosive properties
-	

	Oxidizing properties:	not applicable, the substance does not have oxidizing properties
SECTION	10: Stability and reactivity	
	Reactivity	
	Stable under normal conditions	
10.2.	Chemical stability	
	Stable under normal conditions	
10.3.	Possibility of hazardous reaction	IS
	None known	
10.4.	Conditions to avoid	
	Avoid heating the product at hig	gh temperatures
	Avoid dust generation and any	accumulation of electrostatic charge
	Dusts at sufficient concentration	ns can form explosive mixtures with air
10.5.	Incompatible materials	
	Strong oxidizing and reducing a	
10.6.	Hazardous decomposition produ	icts
	In case of fire and high tempera	atures can develop nitrogen oxides, metal oxides
SECTION	11: Toxicological information	on Aller and a second se
	Information on toxicological effe	
	The mixture is classified as not l	
	Information on likely routes of ex Inhalation:	kposure:
	Possible irritation to the respirate Skin:	ory tract
	Possible irritation according to the Eye:	ne contact time with the product
	Possible irritation according to the Ingestion:	ne contact time with the product
	Possible irritation of mouth and	digestive tract.
SECTION	12: Ecological information	
	Toxicity	
		so that the product is not released into the environment.
12.2.	Persistence and degradability	
	No data available	
12.3.	Bioaccumulative potential	
	No data available	
12.4.	Mobility in soil	
	The product is soluble and mob	ile in both terrestrial and aquatic compartments
12.5.	Results of PBT and vPvB asses	
	vPvB Substances: None - PBT	Substances: None
12.6.	Other adverse effects	
	None known	

SECTION 13: Disposal considerations 13.1. Waste treatment methods

Product :Recover if possible. In so doing, comply with the local and national regulations currently in force.

Packaging: Dispose according to regulations.

SECTION 14: Transport information

- 14.1. UN number
 - Not classified as dangerous in the meaning of transport regulations.
- 14.2. UN proper shipping name Not pertinent
- 14.3. Transport hazard class(es) Not pertinent
- 14.4. Packing Group Not pertinent
- 14.5 Environmental hazards IMDG-Marine pollutant: No
- 14.6. Special Precautions for User Not pertinent
- 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code Not pertinent

SECTION 15: REGULATORY INFORMATION

New Zealand

Classification

Classified as non-hazardous according to HSNO Act 1996; Hazardous Substances (Classification) Notice 2017.

National Chemical Inventory (NZIoC)

USA -Regulations

Hazard Communication Standard (HCS) Haz Com 2012 OSHA, 29 CFR 1910.1200(g) and Appendix D. United Nations Globally Harmonized System of Classification and Labelling of Chemicals (GHS), third revised edition, United Nations, 2009. Hazard Communication Standard

United Nations Recommendations on the Transport of Dangerous Goods.

OSHA Permissible Exposure Limit

29 CFR 1926.55 Appendix A

American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV)

National Institute for Occupational Safety and Health (NIOSH) Recommended Exposure Limit (REL)

Chemical Abstracts Service (CAS) Registry Number

EU-Regulations

Contains no REACH substances with Annex XVII restrictions

SECTION 16: OTHER INFORMATION

This document was prepared by a competent person who has received appropriate training. The information contained herein is based on our state of knowledge at the above-specified date. It refers solely to the product indicated and constitutes no guarantee of particular quality. It is the duty of the user to ensure that this information is appropriate and complete with respect to the specific use intended.
